

Aquaclear

Wall Coatings

Aquaclear is a clear, non yellowing water based polyurethane coating engineered to provide exceptional properties to conventional wall coatings (acrylics, OBD etc.).

Aquaclear is applied as a hardwearing clear top coat over conventional wall finishes.

Aquaclear is a one part polyurethane coating that develops into an exceptionally hard coating at ambient temperature without the need of a catalyst or a cross linker.

Advantages:

- No odor, water based.
- No mixing, single component
- Non-yellowing.
- Does not change the colour of the wall coating.
- Extremely durable.
- Glossy and satin versions.
- Abrasion resistant
- Resistant to oil stains.

Directions to use on walls:

- Slightly sand the surface.
- Apply Aquaclear by roller.
- 1 or 2 coats are recommended.
- Allow to dry.

Coverage:

- 200 sq.ft. / litre / coat
