

FB 304

FB 304 is a silane based, single component clear primer recommended for non porous substrates like glass, aluminium, GI etc. It has excellent adhesion to these substrates and bond well with polysulphide and polyurethane sealants.

Properties:

- Excellent adhesion.
- Excellent penetrating properties.
- Excellent bond to PU and Polysulphide sealants.

Application areas:

FB 304 is used as primer for non porous substrates in conjunction with polysulphide range of sealants.

Direction to use:

- Ensure that the surface is absolutely dry and free from oil, grease and other contaminants.
- Stir FB 304 well.
- Apply by roller / brush.
- Allow to cure for 1 hour.
- The primed surface is now ready to receive sealant.

Typical physical properties:

Type	Organo silane based
Mixing ratio(R:H)	Single component
Colour	Clear, transparent
Flash point	Above 30° C
Surface dry	45-60 minutes
Tack free dry	1-2 hours
Coverage	20 sq.m per litre
Clean up	PUT 502
Shelf life	12 months in the unopened container.
